

Z-MAX™ 6A SHIELDED OUTLETS

PATENTED

WORK AREA

Combining exceptional category 6A performance with best-in-class termination time, the Z-MAX 6A shielded outlet is a vital part of an end-to-end Z-MAX 6A shielded cabling system. The Z-MAX module exceeds all applicable industry standards, including ANSI/TIA-568-C.2 and ISO/IEC 11801 Ed 2.2

This exceptional performance is achieved through Z-MAX's innovative Z-TOOL termination process, and linear termination module that eliminates split and crossed pairs. The exclusive diagonally-oriented IDC contact configuration maximizes pair-to-pair separation, minimizing alien crosstalk in even the densest category 6A patching environments.

Zero-cross termination module accelerates lacing and eliminates pair crossing

Optional spring loaded door minimizes exposure to dust and other contaminants.

Rapid shield connection and cable jacket strain relief via integrated hinged metal clip

Diagonal IDC alignment maximizes outlet to outlet pair separation to achieve AXT performance in high-density environments

The ergonomic and easy-to-use Z-Tool ensures a fast, low force termination

Hybrid design allows the same outlet to be mounted in flat or angled orientations
